

Advertising Tools

Contributed by Administrator

Advertising Tools After you find a business to work at home, you need to let people know you are there. On this page you will find several great ways to do this, such as Safelists, Traffic Exchanges, Free Classifieds, Group Mailers, Solo Ad Mailers, Google strategies, List Builders, etc. You can even submit your website for free to 22 good search engines (see Free Submission page). Use as many methods as you can because you can never have too much traffic. Customers = No Business! First, get your FREE report: Critical List Building by Clicking Here!

AUTORESPONDERS Autoresponders are one of the most important tools you can use if you are online. An Autoresponder is a system that sends automatic replies to requests for information. Requests can come via email or an online form. Once you set it up, an autoresponder works for you 24 hours a day - even while you sleep! It's like having an army of little robot salesmen - all working for YOU!

The best place to get autoresponders is Trafficwave because they give you UNLIMITED autoresponders, each with their own 'capture' page. Plus ad tracking, FREE leads, and so much more...all for under \$20 a month. === BONUS === you can also get some nice monthly checks from Trafficwave! Join Trafficwave here: Click Here

Ad Blasters) Mailers generally send your ad out to huge databases of email addresses. These are not free - but it's a low

ONE-TIME fee. You can use the mailers forever and never pay again! They all have their own rules so please read

carefully before you purchase a mailer. Some allow you to submit an ad once every 24 hours - others allow you to submit

unlimited ads.

Create Your Own Products Associate Program Handbook FREE BLOGS You can get some extra exposure with a blog.

Blogs can be used for anything - personal updates to friends & family, to show off your pets, or to promote a business

interest. They are simple 1 page sites so they are perfect for anyone who wants a web presence but can't yet do the

domain and hosting for a full website. You can get a free blog at many places. I recommend : BlogSpot

Traffic Exchanges These are all FREE to do. It's a trade-off - you look at other people's websites while they look at yours.

It's a great way to get your site seen for free! And if you don't have the time to spend on it, you can usually buy credits for

people to view your site. Orchid Hits

****NOTE**** When you join a safelist, you agree to receive email ads from other members of that list. So be prepared to get tons of emails in your inbox. Most free email accounts give you 4-10 MB of space which fills up really fast, plus most of them 'bounce' a lot, which will get your accounts deleted! I highly recommend getting an email account from YuhKnow or GMail for this. [Click Here](#) for YuhKnow [Click Here](#) for GMail

These are just a few of the Traffic Exchanges and Safelists we use. For a more complete listing send a blank email to: cilla.help@info.trafficwave.net A GREAT FREE way to advertise your work at home business:

Make some flyers up that say something about your business and either give your website or an autoresponder email address where they can get more information. You can put these little flyers on public bulletin boards, leave with your tip at restaurants, include with bills you pay (some people even tape them on the inside door of bathroom stalls in public washrooms and on ATM machines!) You can probably think of some other great places to put them!

The only cost for this is the copying (if you don't have your own copier) and the colored paper to make copies with. I recommend bright but not dark colors. I use lime green, gold and orange. You want people to be able to read what your flyer says without straining their eyes! Free Web Submission: [CLICK HERE](#) OPPORTUNITIES are never lost.....they just go to the next person paying attention!
